- Contributes to the normal maternal tissue growth during pregnancy.
- Best Choice For Iron Deficiency “Anemia”.

Ferrobil****TM

Ferrous Bisglycinate, L-Methylfolate,
Multi Vitamin & Minerals

FerrobilTM Tablet Syrup

Ferrous Bisglycinate, L-Methylfolate,
Multi Vitamin & Minerals

For the
TREATMENT
Of Iron Deficiency
Anemia

New Generation iron, Folic Acid & Vitamins

Comparison with Ferrous Gluconate

Ferrous bisglycinate **Ferrobil** iron is as effective as ferrous sulfate 50mg iron in the prophylaxis of iron deficiency and anemia during pregnancy in a randomized trial. In the prevention of ID and IDA, ferrous bisglycinate was not inferior to ferrous sulphate. Ferrous bisglycinate in a low dose of 25mg iron / day appears to be adequate to prevent IDA in more than 95% of Danish women during pregnancy and postpartum.

What Ferrobil Tablet are and what they are taken for

Ferrobil Tablets are a multivitamin and mineral supplement. They contain a combination of many essential vitamins, minerals and trace elements. The human body requires a wide variety of vitamins, minerals and trace elements to perform crucial daily tasks such as releasing energy from food and repairing cell damage. During certain illnesses, your body either cannot get or cannot efficiently use all of the vitamins, minerals and trace elements it needs. Your doctor, dietician or pharmacist will give you **Ferrobil** Tablets if your diet has not provided you with enough vitamins, minerals and trace elements. Each Tablets contains the following many essential vitamins, minerals and trace elements, each of which plays a vital role in the efficient daily maintenance of many body processes.

L-Methylfolate (A new bioactive & better version of folic acid)

50% of the general population has inborn error in the MTH-R enzyme, which limits their capacity to convert folic acid to L-methylfolate.

L-methylfolate is the bioactive form of folic acid & does not need to undergo the conversion process.

L-methylfolate was more effective than folic acid & significantly reduce risk of NTD better than folic acid.²

COMPOSITION

Each Tablet Contains:

Ferrous Bisglycinate (Chelated).....	50mg
L-Methylfolate.....	600mcg
Vitamin B12 (Methylcobalamin).....	25mcg
Rose Hip Extract.....	10mg
Calcium Carbonate.....	120mg
Vitamin C.....	60mg
Vitamin A.....	2000IU
Vitamin D.....	500IU
Vitamin B1 (Thiamine).....	4.5mg
Vitamin B6 (Pyridoxine).....	13mg
Magnesium.....	100mg
Collagen.....	10mg
Zinc.....	24mg

Dosage: (Adults)

Pregnancy associated anemia
Anemia of all origins, folate deficiency.
1-2 tabs per day or as advised by
the physician.
