JOINT PAIN RELIEF

MecObil Delivers numerous benefits, including reduced muscle spasm, reduced inflammation and controls overactive nerve impulses. It offers a lot of pain relief with autoimmune conditions such as rheumatoid arthritis, lupus and scleroderma.

JOINT FUNCTION SUPPORT

MecObil Is a major constituent of basic cartilage, tendons, ligaments, bone and synovial fluid (joint fluid). Also used in the body to synthesize chondroitin sulphate, **MecObil** is an important nutrient to healthy joint function which promotes flexibility.

JOINT MOBILITY

MecObil Sulfate is used by the body for cellular regeneration for the formation of tissues including tendons, ligaments, cartilage, muscles and even bones. For this reason it is essential for optimal joint function, mobility and flexibility. Since cartilage has no blood supply, this fluid is necessary to nourish and lubricate joints.

DOSAGE

As directed by the physician.
